"Nothing great was ever achieved without enthusiasm" (Ralph Waldo Emerson)

Please Note: I am currently on detail to the EPA Region 10 office in Portland, Oregon until July 23, 2016. Thank you!

Your Comments: I believe the proposed remediation for Portland, OR harbor superfund site is woefully inadequate to effectively address the level of

pollution in the subject area. Reliance on "monitoring" of natural remediation is a joke, and an excuse to ignore the ongoing pollution.

In-stream storage/remediation of polluted soils is also woefully inadequate.

It is highly likely that future heavy floods, or expected large earthquake in region, will cause liquifaction and spread of such stored contaminated

in-stream soils. Need to significantly strengthen remediation strategy beyond the EPA recommended watered down approach.
